# **Internet Marketing Success Tips - How To Show A Profit In Your Business**

Today the majority of people have absolutely no idea of the incredible number of assets and resources that are readily available to them today that could be used to building and growing an information product business.

When people are asked to tell what their assets are, as a rule they are offered a short list of items like equipment, money, education, products and so on. However, in fact the asset is much more than what those types of things represent.

In accordance to its definition, an asset is a useful quality, people or thing. If you are unaware of all the valuable assets that are currently at your disposal, then you just cannot use them in full.

Thus there is a need to look at a handful of the different powerful business building assets that you have at your disposal - some of key assets that will allow you not just to survive, but thrive in your information product business.

#### - Contacts

You need to make a list of all of your contacts and their relationship to you. Try to include all the business Associates, your past and present coworkers, past and present supervisors and bosses, your networking acquaintances, all the suppliers and vendors you know.

As well do not forget to include business and personal service providers, your blogging and other social networking contacts, your media and PR contacts, mastermind partners and so on. You do not have to overlook anyone. Sometimes it is the people you least expect who will be your the most valuable connection.

#### - List assets

Try to record any contact lists that you currently have or could easily get access to. You have to include your own or others' potential and customer list, membership, club, professional association and other group lists.

You have to be sure to include any lists that you would like to get access to.

#### - Your personal assets

It is necessary to make a detailed list of your main strengths, skills, education and any specialized training that you have had. You have to take into consideration all areas of your life - parenting, relationships, health, fitness and finances.

As well you do not have to forget to include such things as musical and foreign language training, volunteering and experience.

#### - Financial and other liquid assets

You have to make a list of your cash assets including savings, credit lines and different retirement funds and accounts. Try to record anything else that could be sold or converted into a cash asset.

As well do not forget to take into consideration real estate and other potentially cash generating assets.

When you take some time in order to take stock of the assets and resources that are available to you, you will easily discover that it is much easier to start and build a profitable internet marketing business.

When the time comes to build the [Internet marketing](#) strategy for the promotion of your product online, you must seriously think over the issue about how you will be getting [web traffic](#) to your site or blog.
